■ Package content:

(1) Quick Installation Guide

(6) Screws

(2) Changeable Panels (Silver, White)

(2) USB cables

(White)

(Silver)

Cable A

Cable B

USB cables : Cable A(see picture A) : 4pin header(white).
Cable B(see picture B) : 5x2pin header(black).
Please check the USB connector on motherboard firstly.
If connector on motherboard is white, please use Cable A.
If it is black, please use Cable B.

The default PC22 is with black panel. If you would like to change it with silver or white one, please refer to following steps.

■ How to Change Your Card Reader Face Plate

Step 1

Remove the cover on it.

Step 2

Remove the face plate carefully by detaching its four clips from the holes on the both sides of the card reader.

Step 3

Attach the desired face plate to your card reader.

Step 4

Screw the cover to reposition, then fasten it with screws. You have a personalized face plate of your own now!
